

Kris Bennett.

I help businesses turn ideas into working software – faster and leaner, delivering the output of a full team on my own with a modern toolset.

For 25 years I've helped organizations turn complex problems into software that actually ships – from Fortune 500s and government agencies to fast-moving startups. Today I do it solo, using a modern toolset to deliver in weeks what used to take a full team months. I've architected enterprise systems at IBM and CGI, and co-founded and sold a company that trained 150,000+ professionals worldwide. If you have an idea, a problem, or an aging system holding you back, I take it from “what if” to working – without the overhead, delays, and hand-offs of a traditional build.

25+

years turning ideas into shipped software

150K+

professionals trained worldwide

Weeks

from idea to launched – not months

HOW I HELP

Idea → working MVP

Real, working software in weeks – not a slide deck or a six-month quote.

Automation & efficiency

Modern tools and automation that cut busywork and put your own data to work for you.

Full product builds

Customer-facing web and mobile apps, from first sketch to launch.

Fractional tech lead

One accountable senior partner – strategy to launch, no hand-offs.

Under the hood: React · Next.js · Node · Python · AI / LLM tooling · cloud & self-hosted infrastructure · web, mobile & IoT.

TRACK RECORD

Founder & Solutions Architect

Mar 2026 – Present

Twelve Rocks, LLC · Elizabeth, CO

- Take businesses from idea to launched product – strategy, build, and delivery handled by one accountable partner instead of a patchwork team.
- Deliver in weeks what agencies quote in months, using a modern toolset to do the heavy lifting – so clients spend less and find out what works sooner.
- Build the things that earn or save money: customer-facing web and mobile apps, internal tools that erase busywork, and automation that works reliably on a company's own data.
- Available for a single build, a quick MVP to test an idea, or an ongoing fractional technical lead role.

Developer Relations Specialist

Feb 2025 – Mar 2026

Input Output Global (IOG) · Longmont, CO

- Was the trusted technical voice for a global research organization's most ambitious project – the person who made complex technology make sense to everyone else.
- Turned cutting-edge research into clear, hands-on material that developers around the world could actually pick up and use.

TRACK RECORD continued

Developer Relations

Aug 2023 – Aug 2024

Agoric · Remote

- Built the onboarding, curriculum, and mentor network that brought a worldwide community of builders onto a brand-new platform.

Co-Founder & Chief Learning Officer

Feb 2018 – Apr 2023

Blockchain Training Alliance · Remote · Founded · Sold

- Co-founded a company, grew it into the category’s go-to name – training and certifying 150,000+ professionals worldwide – and sold it.
- Partnered directly with major organizations, including Deloitte, Air France, and the U.S. Patent & Trademark Office, to build their internal programs.

National Architect / Market Lead

Jun 2016 – Apr 2018

IBM (Neudesic) · Denver, CO

- Led modernization programs for Fortune 500 and government clients – replacing aging systems with ones that run faster, cost less, and are ready to grow.

National Solutions Architect

May 2013 – May 2016

CGI (ECSTeam) · Denver, CO

- Owned the technical direction on large enterprise projects, making sure complex builds delivered on time and held up under real-world demand.

Enterprise Architect

Sep 2011 – May 2013

RBA Consulting · Denver, CO

- Set technology strategy and roadmaps for complex organizations – and led the teams that turned them into working systems.
